I don't know who put those amounts in the EPA direct and indirect. I had only entered the START costs because that's what I can readily access.

So we have two options. 1. I can take out the \$30k line item for START and just show the direct and indirect which totals \$50k or 2. I leave START line item and recalculate the direct/indirect amounts so it all three items add to the \$50k

The FPN is currently at \$50k for its ceiling, yes. I will have to defer to Steve regarding the costs... The financial section definitely does seem out of whack with the previous statement about the ceiling being \$50k.

As for actual bills we only have a couple thousand showing on our side so far as I can see.

Morning guys,

Is the ceiling on this case 50K, I cant access my system to check but recall it being 50K as indicated on polrep. Cost estimate on this polrep shows \$80K in estimated costs?

Dwayne
